

What is claimed is:

1. A copper-clad laminate of a highly-elastic glass fabric base material/thermosetting resin formed of prepreg obtained by impregnating a glass fabric base material made of a glass woven fabric having a thickness of 25 to 150  $\mu\text{m}$ , a weight of 15 to 165  $\text{g}/\text{m}^2$  and a gas permeability of 1 to 20  $\text{cm}^3/\text{cm}^2/\text{sec}$ . with a thermosetting resin composition and drying it.
2. A copper-clad laminate according to claim 1, wherein the thermosetting resin composition in the copper-clad laminate contains an insulating inorganic filler in an amount of 10 to 80 % by weight based on the above resin composition.
3. A copper-clad laminate according to claim 1, wherein the prepreg has a glass content of 25 to 70 % by weight.
4. A copper-clad laminate according to claim 1, wherein a glass fabric base material/thermosetting resin layer of the copper-clad laminate has a thickness of 30 to 150  $\mu\text{m}$ .
5. A copper-clad laminate according to claim 1, wherein the thermosetting resin composition is a resin composition containing, as an essential component, a polyfunctional cyanate ester and a prepolymer of said polyfunctional cyanate ester.
